

IUCLID 6

Version 2.0.0 release

15 November 2017

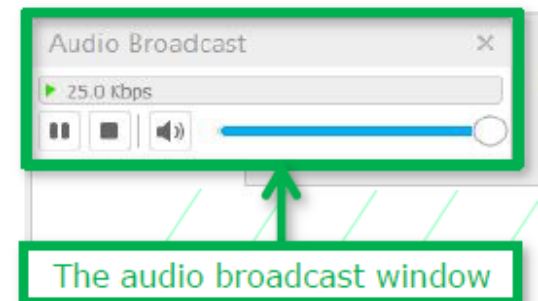

IUCLID 6 is developed by the European
Chemicals Agency in association with the OECD

Audio troubleshooting

- If the volume is too low, try to increase the sound volume of your computer.
- If the audio cannot be heard at all, verify that the audio broadcast window shows a green triangle and that the volume slider is not too low.
- If the problem persists, you can use a telephone for receiving audio.
 - Click the button shown above to *Request Audio*
 - Select *Use phone*, enter your phone number
 - Click on the *Call me* button

The *Request audio* button is only needed to connect audio by phone should the audio broadcast not work properly.

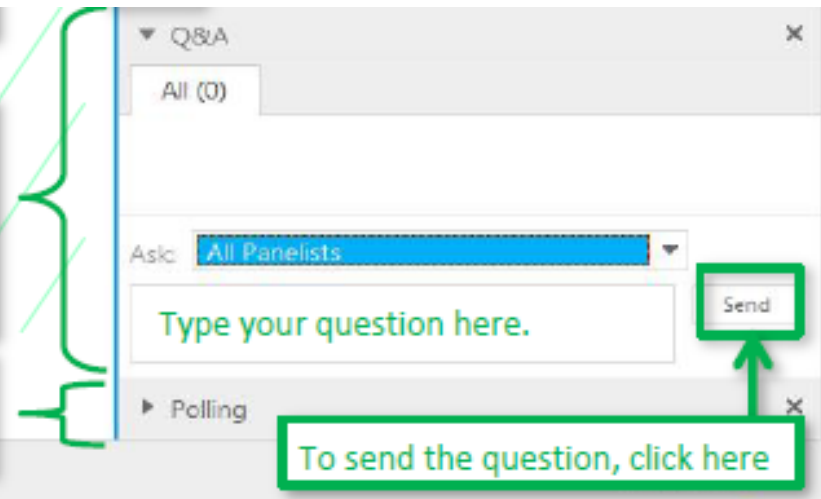

The Q&A panel

- You can post your questions during the entire webinar
- Before the Q&A session, 5 minutes will be left to send additional questions

The Q&A panel

You can send questions during and after the presentations to the panellists, using the Q&A panel
To send a question, select *All panelists* from the drop down menu, write your question in the lower box, and finally click *Send*.

If a poll is opened during the webinar, the polling panel will open automatically

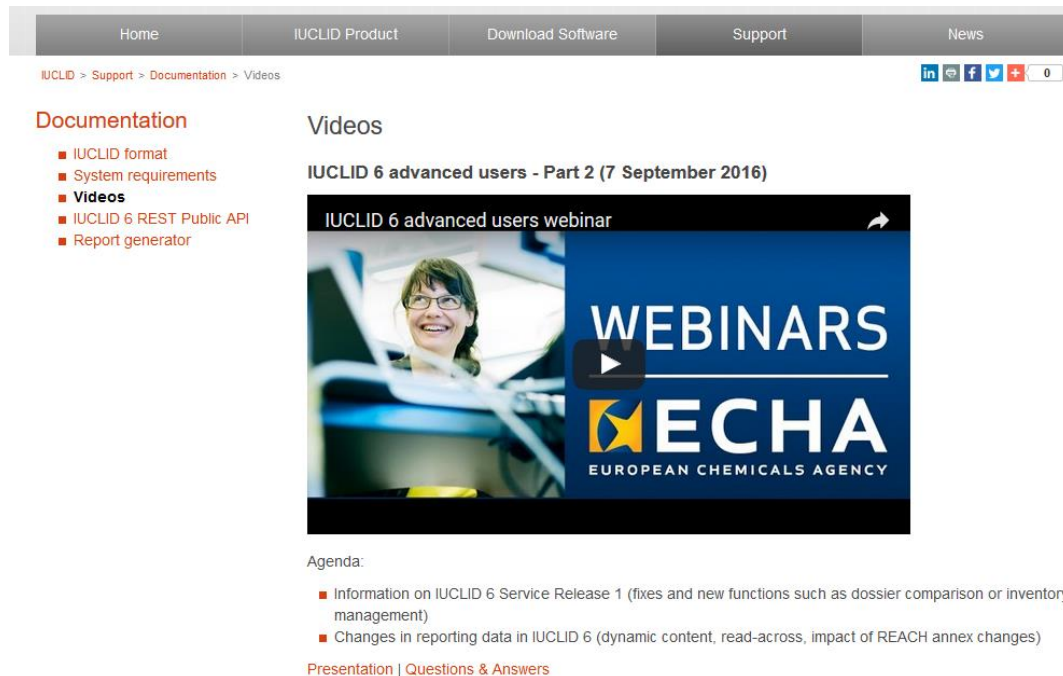

The Q&A panel

- Questions will be answered privately, i.e. you will not see each others questions and answers
- We will answer the most frequently asked questions at the end of the webinar
- Your questions will be kept anonymous

Recordings

- After the meeting, we will publish on the IUCLID 6 website
 - The recording of the webinar (+ presentations)
 - Questions and answers (written document)

The screenshot shows the IUCLID 6 website's documentation section. At the top is a navigation bar with links: Home, IUCLID Product, Download Software, Support, and News. Below the navigation bar is a breadcrumb trail: IUCLID > Support > Documentation > Videos. On the left, under the 'Documentation' heading, there is a list of links: IUCLID format, System requirements, Videos (highlighted), IUCLID 6 REST Public API, and Report generator. The main content area is titled 'Videos' and features a video player for 'IUCLID 6 advanced users - Part 2 (7 September 2016)'. The video player shows a woman smiling and the ECHA logo. Below the video player, there is an 'Agenda' section with two bullet points: 'Information on IUCLID 6 Service Release 1 (fixes and new functions such as dossier comparison or inventory management)' and 'Changes in reporting data in IUCLID 6 (dynamic content, read-across, impact of REACH annex changes)'. At the bottom, there are links for 'Presentation' and 'Questions & Answers'.

Agenda for today

What?	Who?	When?
Welcome and introduction	François Le Goff	12:00 (EEST)
Information on IUCLID 6.2	Mark Roberts	
Compatibility between IUCLID versions Installation and update	François Le Goff	
Fee calculator	Alexis Quintana-Sainz	
Update on ECHA Cloud Services and IUCLID Cloud	Tommy Hägg	
Questions and Answers session	All participants ECHA	Until 13:00

Information on IUCLID 6.2

IUCLID news

14/11/2017

Update of IUCLID 6 available

A new version of IUCLID has been published on the IUCLID website. It includes improvements, such as updated formats taking into account the latest OECD test guidelines and GHS/CLP requirements.

The updated IUCLID (version 6.2) introduces:

- An update of the IUCLID format to take into account the latest developments of the OECD test guidelines, the support of new online dossiers for REACH purposes and the latest updates of the CLP Regulation and the Globally Harmonised System for Classification and Labelling (GHS).
- A new export option that allows exchange of data with previous versions of IUCLID 6.
- A fee calculator that will inform REACH registrants about their fee before they submit their dossier.

Updating IUCLID to the latest version is not mandatory. Companies can continue preparing their dossiers and notifications with the IUCLID 6 versions published earlier as ECHA's completeness check remains unchanged. However, the update is strongly recommended, for example, to fully benefit from the new features and to have the optimal use of Chesar, ECHA's Chemical Safety Assessment and Reporting tool.

The IUCLID Cloud for SMEs service will be automatically updated to the latest version in the coming days – users do not need to do anything. SMEs and their consultants are encouraged to use the cloud service for ease-of-use and better collaboration for creating the registration dossiers.

A webinar presenting the new version and offering practical advice on how to update is taking place on 15 November from 12:00 to 13:00 Helsinki time. You can register from the link below. ECHA's Helpdesk will assist users with any questions about this update.

[Download the new version](#) [Access online Webinar](#)

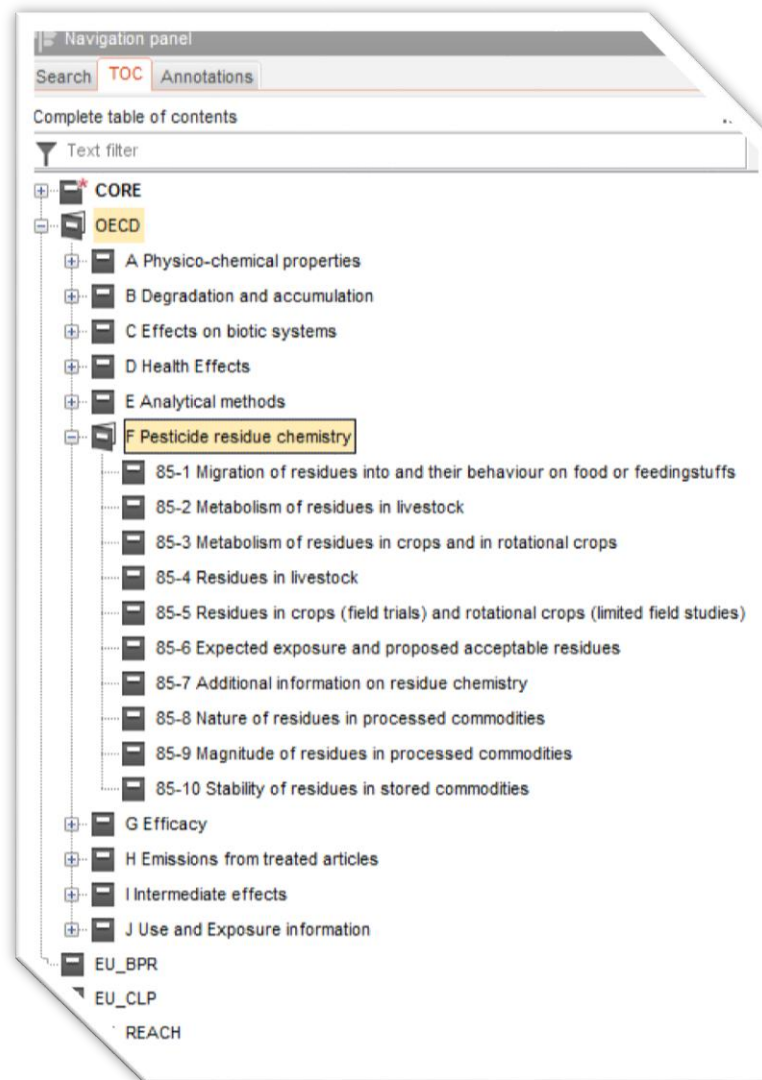

Format changes

New and updated Pesticides' OECD Harmonised Templates (OHTs)

The OECD have updated their series of **OECD Harmonised Templates** on Pesticide Residue Chemistry to cover the entire set of OECD Test Guidelines.

The new and updated OHTs are included in version 6.2 of IUCLID

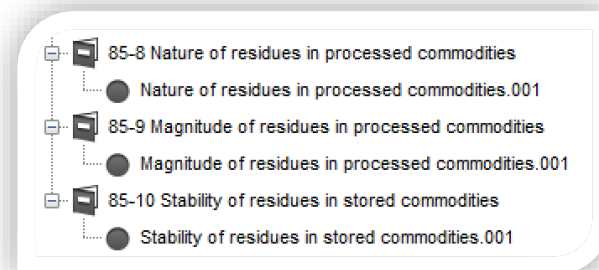

Format changes

New and updated Pesticides' OECD Harmonised Templates

There are **three New** OHTs (document type: endpoint study record):

- Nature of residues in processed commodities
- Magnitude of residues in processed commodities
- Stability of residues in stored commodities

All (7) other Pesticides OHTs have also been **updated**

Specific update: Metabolism of residues in crops and in rotational crops

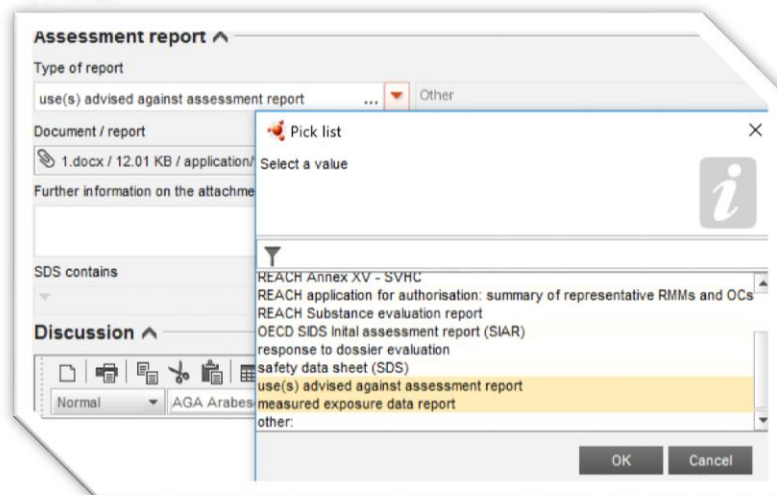

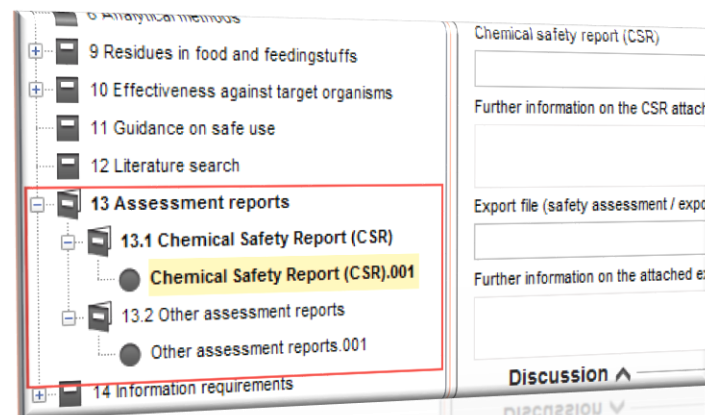

- A merger of two previous templates
- Duplicate fields removed
- New endpoint options available to address residues in crops and rotational crops respectively

Format changes

CSR and assessment reports

- **Section 13** contains **assessment reports**
- The 'Assessment reports' Section had been increasingly used to cover the specific needs of the Chemical Safety Report – CSR
- All elements for the **CSR** are now gathered in **Section 13.1**, including the documentation of Part A which documents a summary and declaration of risk management measures
- **Section 13.2** can now be used to store information solely about **Other assessment reports**, and includes two new report types to select for this purpose:
 - measured exposure data report
 - use(s) advised against assessment report

Format changes

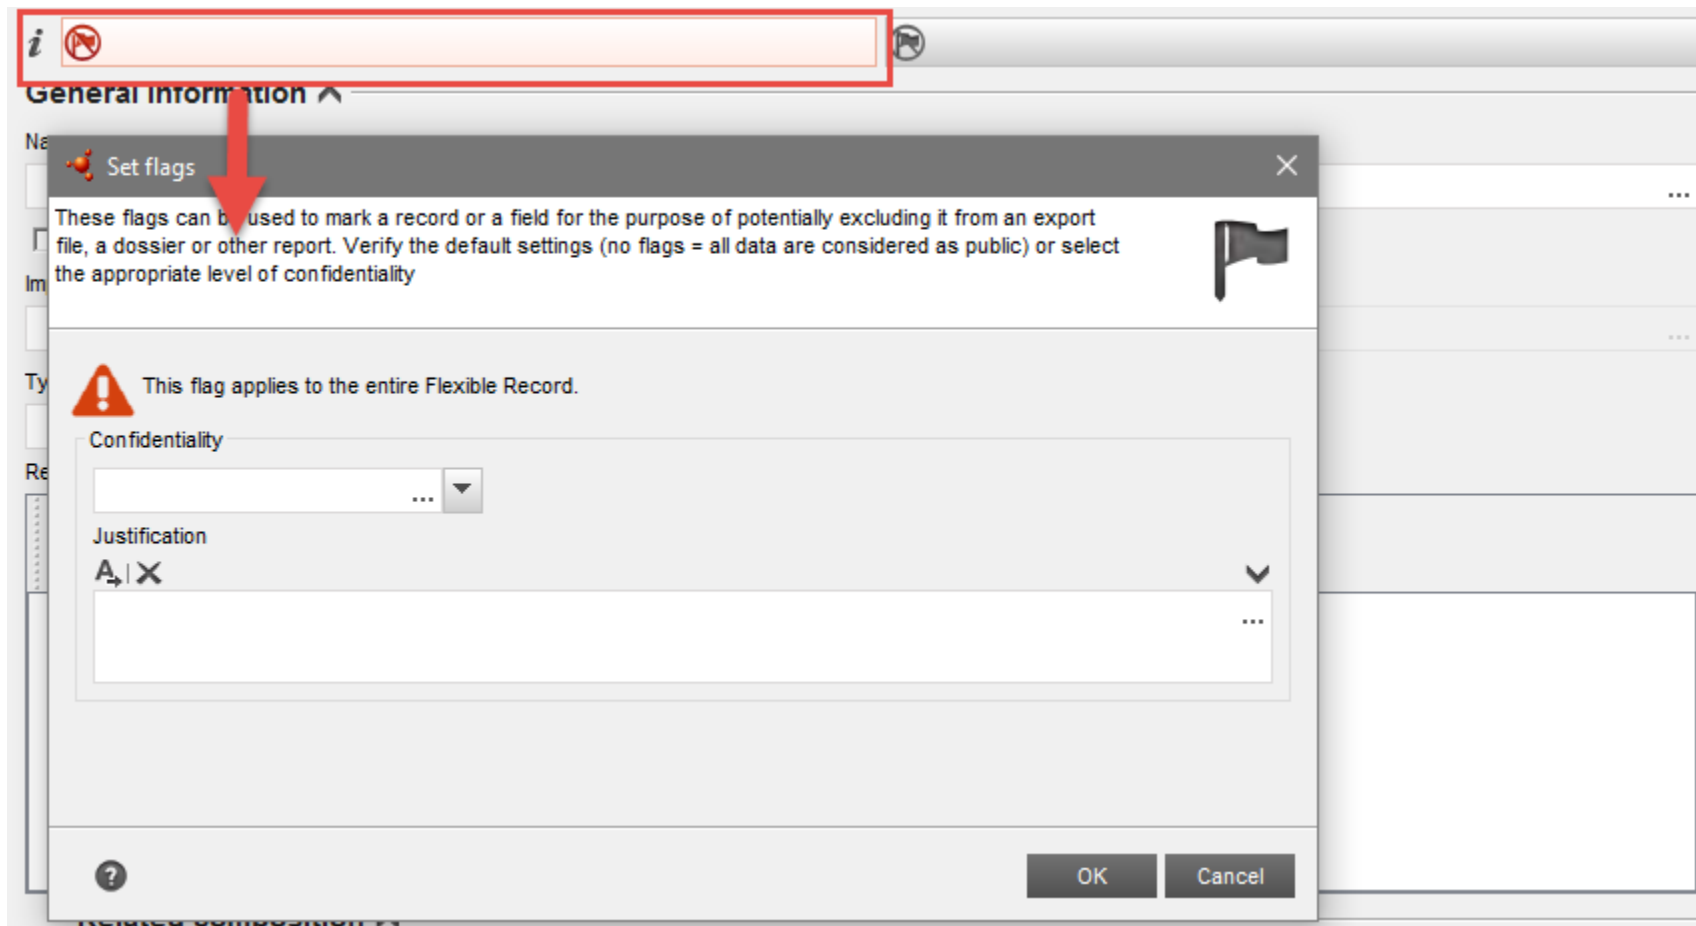

Exchange of experimental data

- New submission type **already** introduced in IUCLID 6 version 1.3.0
- **New in version 6.2:** this submission type can be used for creating dossiers in order to exchange experimental data outside of a specific regulatory context
- Legal entity automatically included in the dossier header
- We would recommend anyone using this dossier header to include which regulatory programme(s) the data was originally generated for

The screenshot displays the IUCLID 6.2 user interface. On the left, a 'Navigation panel' shows a tree structure with categories like 'Exchange of experimental data', '0 Related information', '1 General information' (with sub-items 1.1 Identification, 1.2 Composition, 1.3 Identifiers, 1.7 Suppliers), and '2 Classification and Labelling'. On the right, the 'Dossier creation wizard' is open, showing administrative information fields for 'Dossier name' and 'Dossier submission remark'. Below these are sections for 'Specific submissions' (with a dropdown for 'Regulatory programme(s)') and 'Dossier specific information' (with a checkbox for 'Reviewed by an assessor' and a 'Remarks' text area). At the bottom, there are 'Back', 'Next', 'Finish', and 'Cancel' buttons.

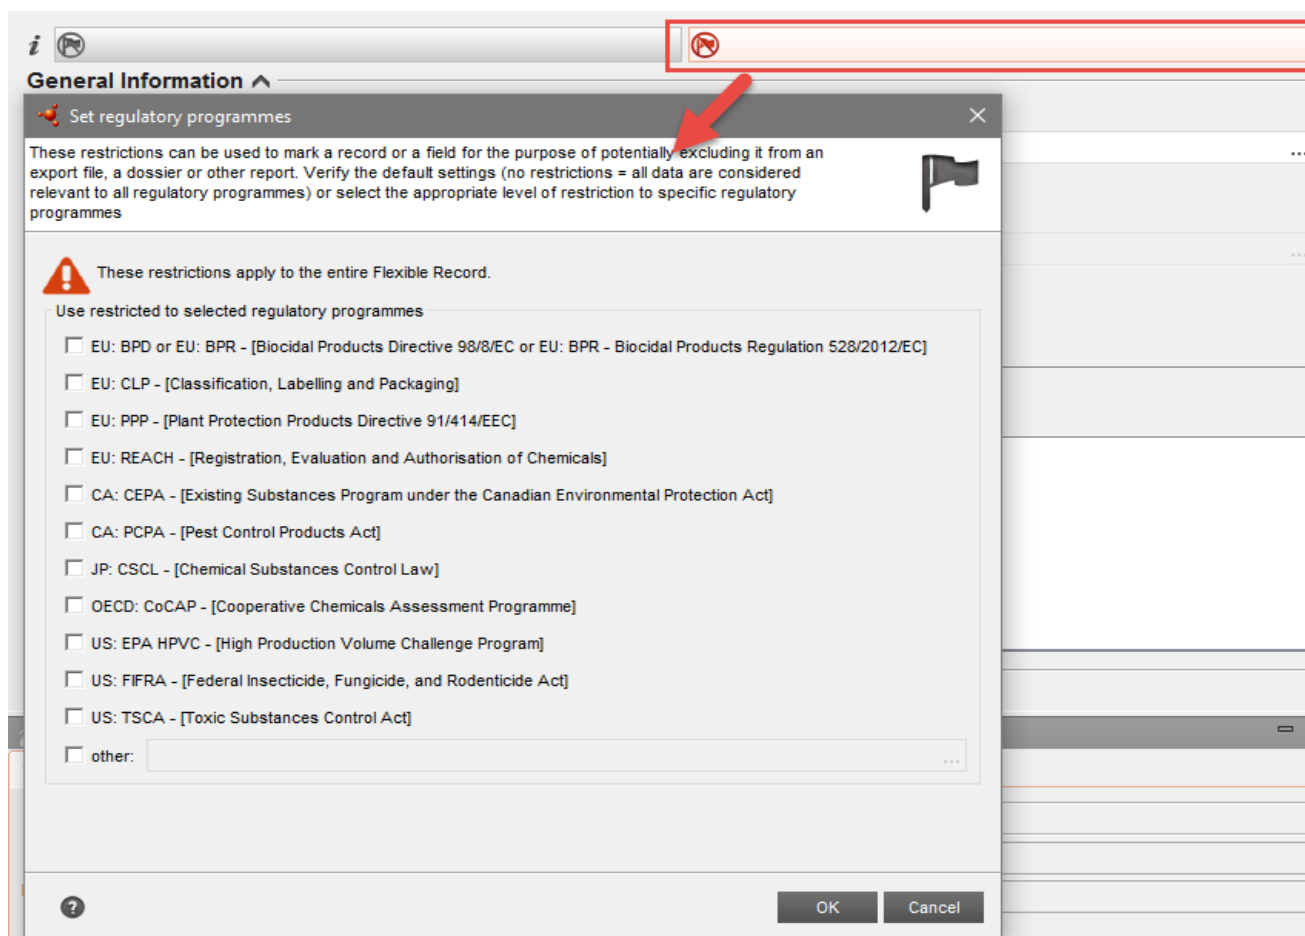

Splitting of the IUCLID flags

- Document-level Confidentiality flag

Splitting of the IUCLID flags

- Regulatory programmes

IUCLID flags

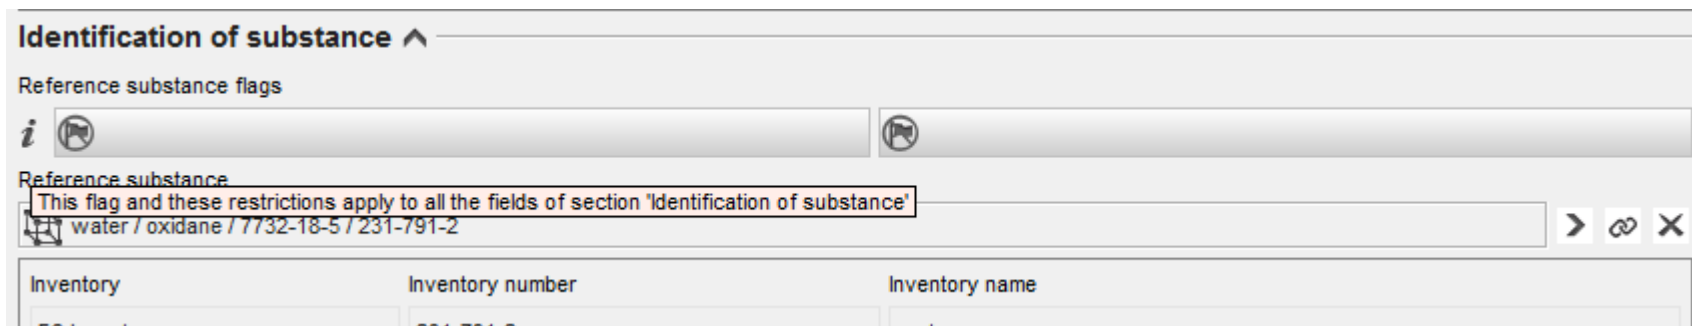

- Each document element (field, section, or even the document itself) is now explicitly linked to a confidentiality claim and a regulatory programme.

Field-level confidentiality flag

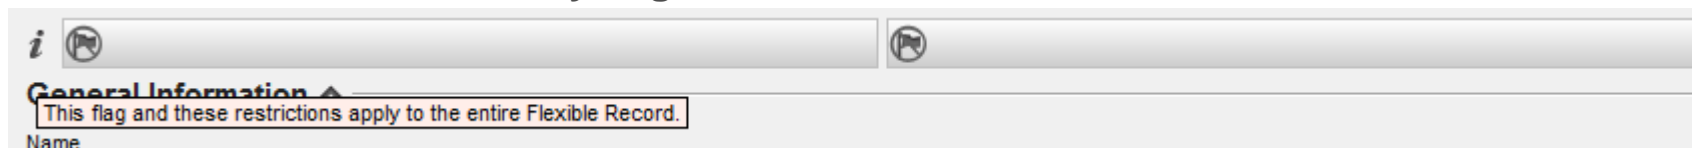

The interface shows a field-level confidentiality flag. At the top, there are two buttons: one with an 'i' icon and another with a flag icon. Below these, a text box contains the message: "This flag and these restrictions apply to the next field 'Legal entity'". Below the text box, there is a dropdown menu showing "DB_Company". To the right of the dropdown menu are three icons: a right arrow, a lock, and an 'X'.

Section-level confidentiality flag

The interface shows a section-level confidentiality flag. At the top, there is a section header "Identification of substance" with a dropdown arrow. Below the header, there is a text box containing the message: "This flag and these restrictions apply to all the fields of section 'Identification of substance'". Below the text box, there is a dropdown menu showing "water / oxidane / 7732-18-5 / 231-791-2". To the right of the dropdown menu are three icons: a right arrow, a lock, and an 'X'. Below the text box, there is a table with three columns: "Inventory", "Inventory number", and "Inventory name". The table contains one row with the following data: "50 Inventory", "231 791 2", and "water".

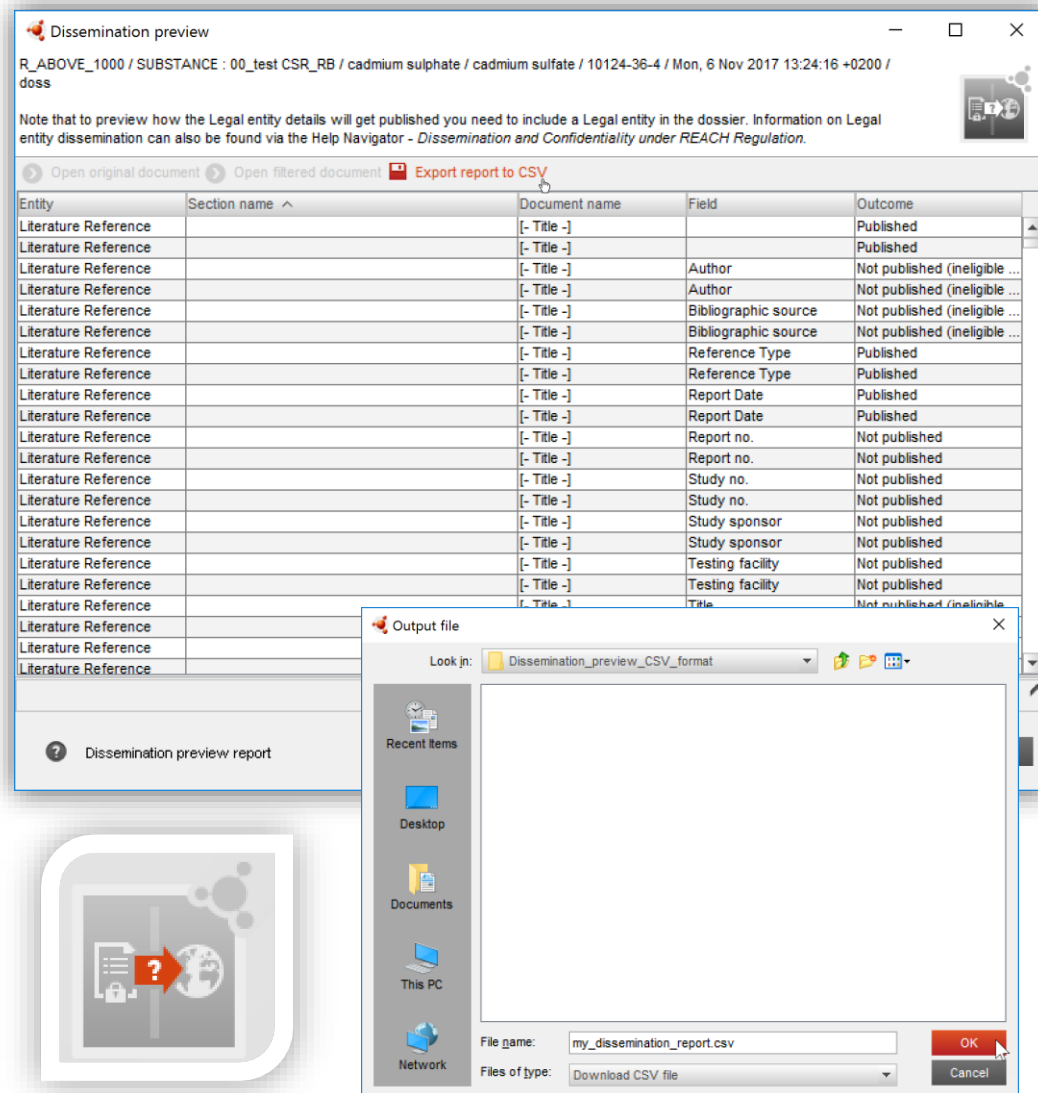

Document-level confidentiality flag

The interface shows a document-level confidentiality flag. At the top, there are two buttons: one with an 'i' icon and another with a flag icon. Below these, a text box contains the message: "This flag and these restrictions apply to the entire Flexible Record.". Below the text box, there is a dropdown menu showing "Name".

Dissemination preview

- Possibility to export and save the dissemination preview report as CSV file
- The report can then be opened in MS Excel
- In MS Excel, the report can then be further filtered and sorted, for example:
 - to only show the information which is published, or certain sections

Dissemination preview

R_ABOVE_1000 / SUBSTANCE : 00_test_CSR_RB / cadmium sulphate / cadmium sulfate / 10124-36-4 / Mon, 6 Nov 2017 13:24:16 +0200 / doss

Note that to preview how the Legal entity details will get published you need to include a Legal entity in the dossier. Information on Legal entity dissemination can also be found via the Help Navigator - Dissemination and Confidentiality under REACH Regulation.

IUCLID 6 version 2.0.0

Print option (confidential) ⚠

- New option added to allow users to decide if they wish to print a record or a dataset for the fields marked confidential in IUCLID
- This option also extends to the printing of entities in IUCLID for example
 - Reference substances
 - Literature references
 - Legal entities

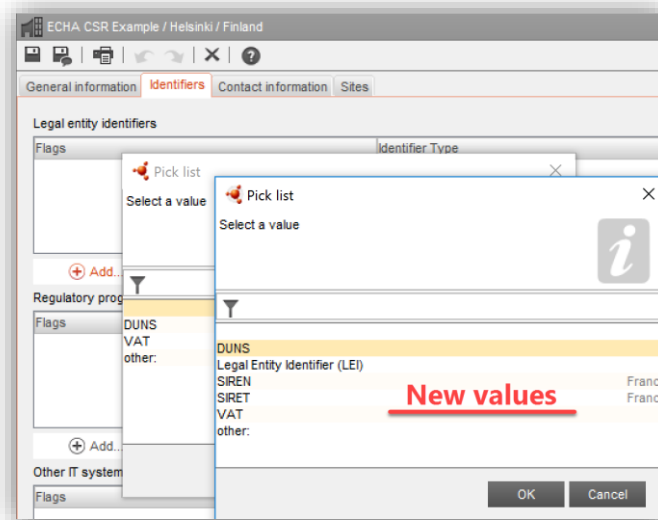

IUCLID 6 version 2.0.0

Additional points of data entry and configuration

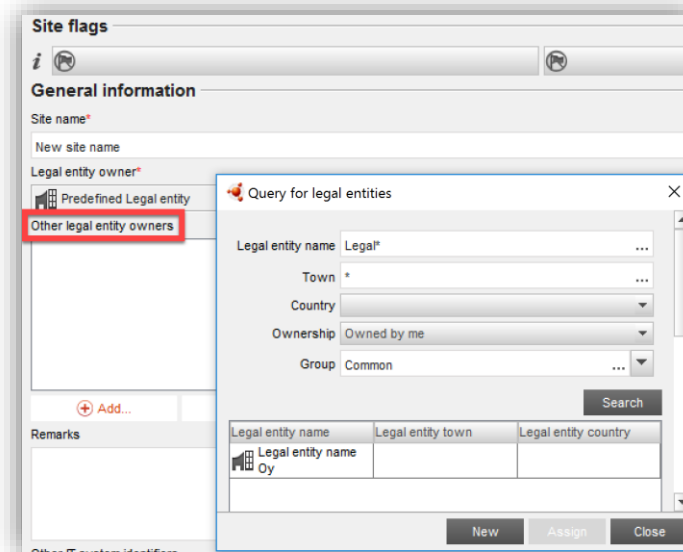

Legal entity

- Legal entity identifiers picklist extended

Legal entity site

- Add more than one legal entity per legal entity site by selecting 'Add' and searching for existing legal entities, or creating a legal entity

Additional points of data entry and configuration

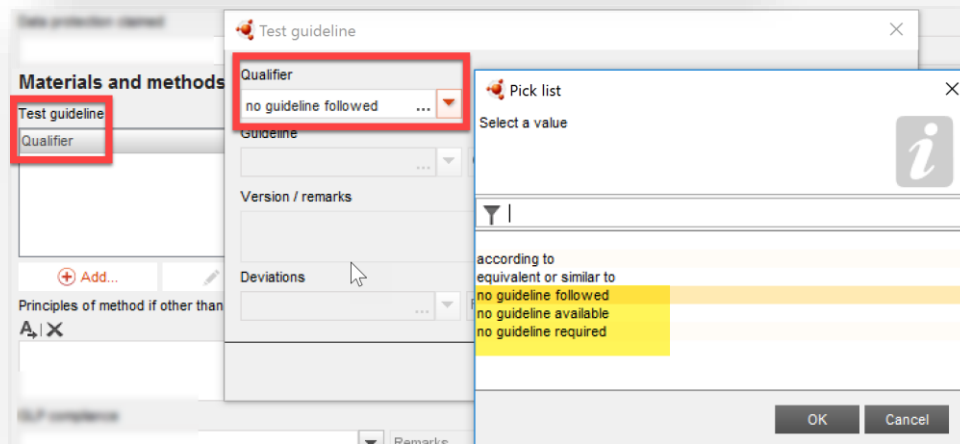

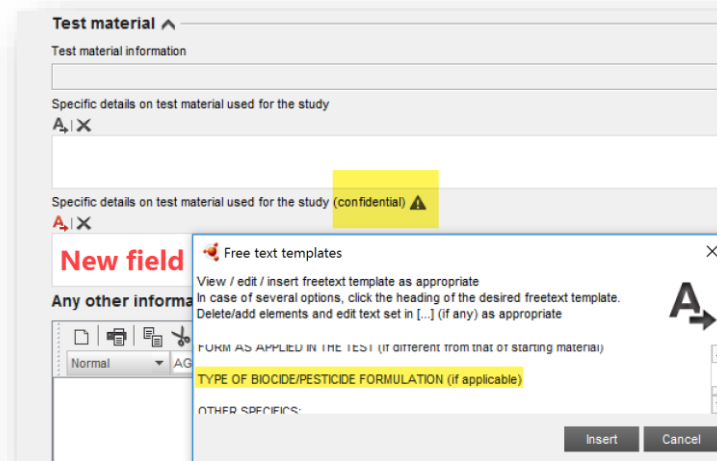

Materials and Methods (changes apply to all endpoint study records)

- **Existing field:** Specific details on test material used for the study

Text template extended to include:
Type of biocide/pesticide formulation (if applicable)

- **New field:** Specific details on test material used for the study (confidential)

- **Extended conditional formatting** to cover version / remarks

Additional points of data entry and configuration

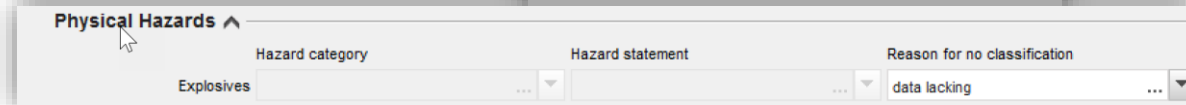

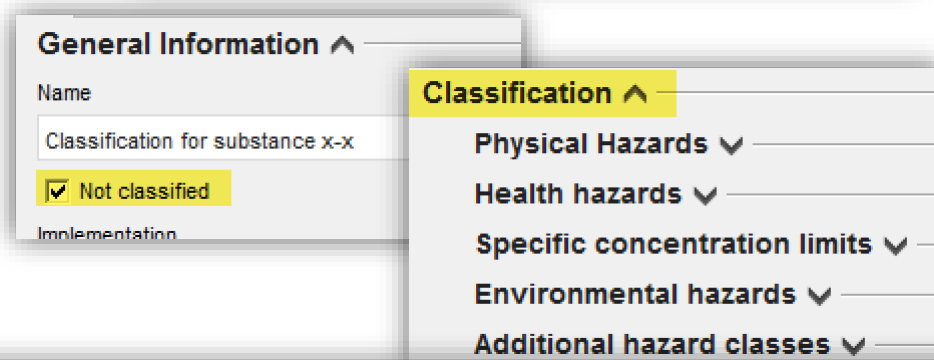

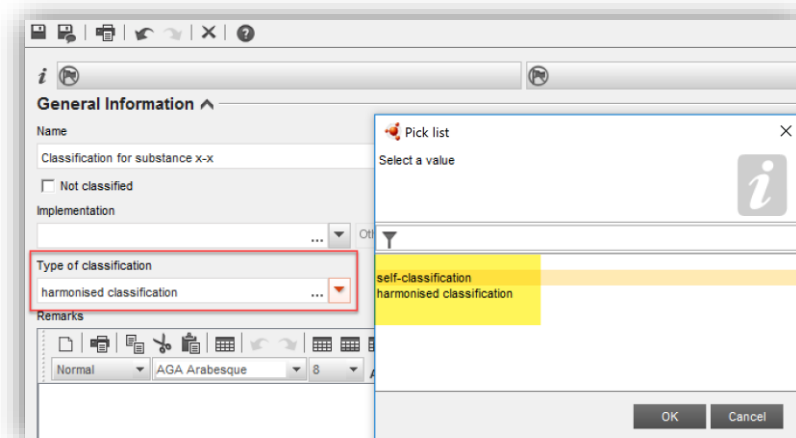

Section 2.1 (GHS)

- New field: Type of classification

Can now distinguish self-classification from harmonised classification

- New Dynamic content

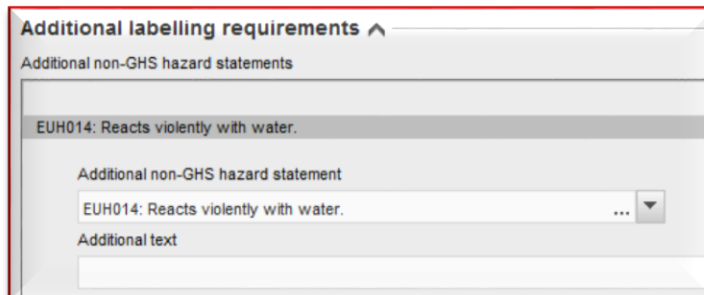

If the 'Not classified' checkbox is ticked, it will disable all hazard categories and hazard statement picklists under the Classification header

Additional points of data entry and configuration

Section 2.1 (GHS)

Under additional labelling requirements, non-GHS hazard statements can be entered

Additional labelling requirements ^

Additional non-GHS hazard statements

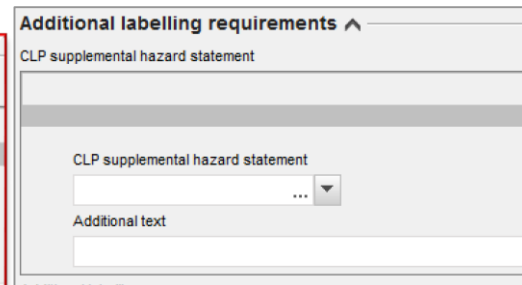

EUH014: Reacts violently with water.

Additional non-GHS hazard statement

EUH014: Reacts violently with water. ...

Additional text

New version

Additional labelling requirements ^

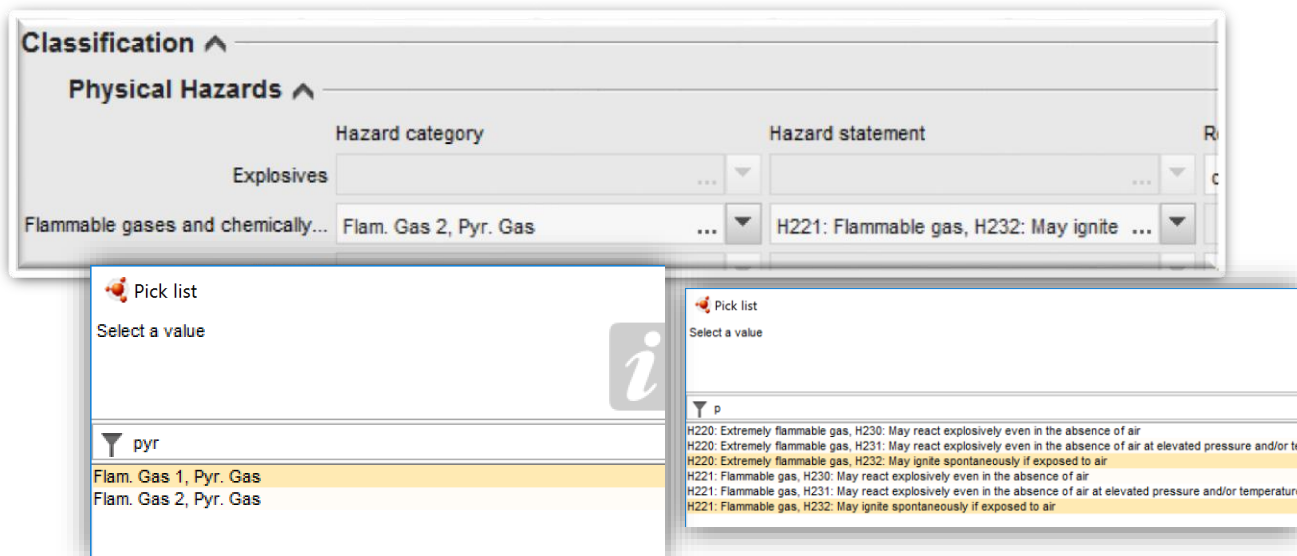

CLP supplemental hazard statement

CLP supplemental hazard statement

Additional text

Previous version

The physical hazard 'flammable gases and chemically unstable gases' has extended hazard category and statement picklists

Classification ^

Physical Hazards ^

pyr

Flam. Gas 1, Pyr. Gas

Flam. Gas 2, Pyr. Gas

Pick list

Select a value

H220: Extremely flammable gas, H230: May react explosively even in the absence of air

H220: Extremely flammable gas, H231: May react explosively even in the absence of air at elevated pressure and/or temperature

H220: Extremely flammable gas, H232: May ignite spontaneously if exposed to air

H221: Flammable gas, H230: May react explosively even in the absence of air

H221: Flammable gas, H231: May react explosively even in the absence of air at elevated pressure and/or temperature

H221: Flammable gas, H232: May ignite spontaneously if exposed to air

IUCLID 6 version 2.0.0

Additional points of data entry and configuration

Other changes to note

New field: Type of water added to the Endpoint summaries of:

- 5.2.1 (Biodegradation in water: screening tests)
- 5.2.2 (Biodegradation in water sediment simulation tests)

To differentiate between the type of water used in the study;
marine, **freshwater**, or **'other'**

In all endpoint study records, the field: Justification for type of information has an extended **Text template** to include **'Read-across (category)'** to provide a summary for the justification of a category approach and to address endpoint-specific elements not covered by the justification made in the overall category approach

The repeatable block for Surface treatment in Composition (1.2) can now be claimed as confidential

Key value for chemical safety assessment ^

Format changes

- The information concerning the IUCLID format is available on the IUCLID website
- Changes introduced in the new IUCLID version are detailed in 'Release Notes'

IUCLID format

Introduction and resources to download

REACH Article 111 ("Formats and software for submission of information to the Agency") states,

"The Agency shall specify formats and make them available free of charge [...] on its website for any submissions to the Agency. Member States, manufacturers, importers, distributors or downstream users shall use these formats [...] in their submissions to the Agency pursuant to this Regulation. [...] For the purposes of registration, the format of the technical dossier [...] shall be IUCLID. The Agency shall coordinate the further development of this format with the Organisation for Economic Cooperation and Development to ensure maximum harmonisation."

Please note that the IUCLID 6 application follows this format intrinsically and IUCLID 6 users need not worry about Article 111 compliance.

You can download all information related to the IUCLID 6 format for the different main IUCLID 6 versions already published. The information of the downloadable archives is organised according to the information presented at the end of this page.

- IUCLID 6.1 format, published on 29th of April 2016  (.zip | 14.7 MB)
- IUCLID 6.2 format, published on 15th of November 2017  (.zip | 15.0 MB)

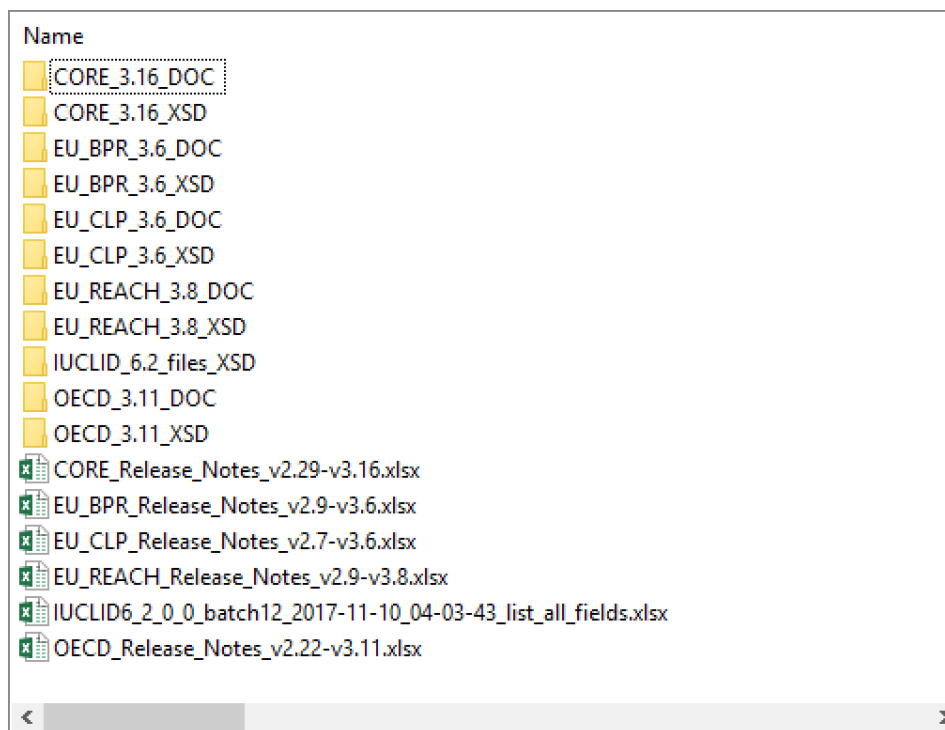

The format is expressed in the general-purpose mark-up language XML, and XML Schema definition files (.xsd) for all IUCLID 6 entities and documents. In addition, the format is made available in a more readable version (.doc).

IUCLID 6 is built as a platform and is a modular system. The IUCLID 6 format is separated in different groups ('legislations') depending on its source identified in the table below.

IUCLID 6 legislations and file format

IUCLID 6 includes the main documents of IUCLID 6 such as the templates for identification, the classification

Format changes documentation

Update to the Chemical Safety Report

Compatible with the latest version of IUCLID v6.2

Annexes	32
1. Annex: References	33
2. Annex: Information on Test Material	34
3. Annex: Mode of action / Human relevance Framework	35

- New **Annex III (Mode of action)**
- New section for **Additional toxicological effects** (CSR chapters 5.10.1.4 & 5.10.3)
- Use information in CSR chapter 2 is displayed according to the **Type of CSR** selected in Section 13.1 combined with the **Related assessment** in the various uses under Section 3.5
 - E.g. If the **Type of CSR** 'Joint CSR (joint uses)' is selected, then the use information will be printed only if 'use assessed in a joint CSR' or 'use assessed in a joint CSR but not a lead's own use' is then selected in the **Related assessment** of a use record
- Readability improvements (for example, removal of labels when not used, table header colouring)

1.3. Physicochemical properties

Table 1.1. Physicochemical properties

Property	Description of key information	Value used for CSA / Discussion
Physical state		Value used for CSA: gaseous at 20°C and 101.3 kPa
Vapour pressure		Value used for CSA: 23hPa at 32K

Other reports available and compatible with IUCLID 6.2

- **Summary of Product Characteristics** report (for uploading into SPC Editor)
 - Can be generated from mixture/product datasets/dossiers as an XML
- Literature references report (RTF)
 - Can be generated from both substance and mixture/product datasets/dossiers
- Attachments report for BPR datasets and dossiers (RTF)
 - Can be generated from mixture/product datasets/dossiers
- Attachments report for substances (RTF)
 - Can be generated from substance datasets/dossiers
- BPR Confidentiality report (Article 66), for BPR datasets and dossiers (RTF/PDF/CSV)
 - Can now be generated as a CSV file and opened in Excel

Compatibility between IUCLID versions

Note for REACH users

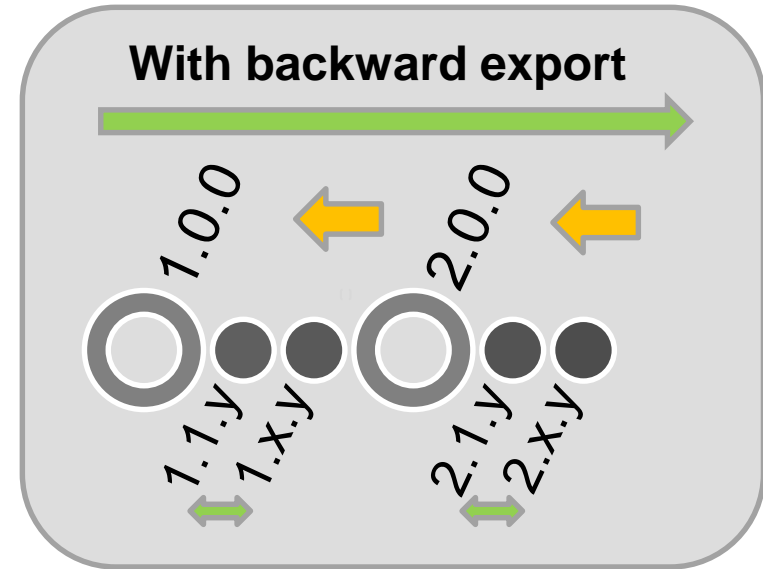

- IUCLID 6 is updated on 15 November. The new version (6.2) brings fixes and improvements.
- Although this update contains improvements, it is not mandatory for the users that need to prepare REACH registrations as ECHA IT systems will continue to be fully compatible with the version of IUCLID 6 published in April 2016 as well as this new version.
- In order to minimise the impact of this new version, ECHA has managed to provide a new export option that allows to exchange data generated with different versions of IUCLID 6.
- IUCLID users have the liberty to choose the most appropriate time for their IUCLID update (e.g. before or after the deadline) and still be able to submit dossiers to ECHA or exchange data between users, regardless of when they decide to update.
- The changes in this new version of IUCLID have no impact in the completeness check decisions by ECHA.

Validation assistant

- The Validation Assistant has been updated in order to work in the same way as before, i.e. no impact for REACH users, e.g.
 - Adapted all business rules and completeness check rules that check section 13 to the new IUCLID 6 v.2.0.0 format
- At the same time improvements have been made, for example
 - Implemented new quality rules (QLT) for hazard endpoints (sections 7.3.1, 7.3.2, 7.4.1, 7.6.1, 7.8.1, 7.8.2)
 - Improved completeness check rule TCC_0102_20 which checks that UVCB substances contain a composition or a justification for deviations
 - A new validation scenario for the new submission type 'Exchange of experimental data' (outside the REACH or CLP regulatory context)
- Full details are available in the release notes

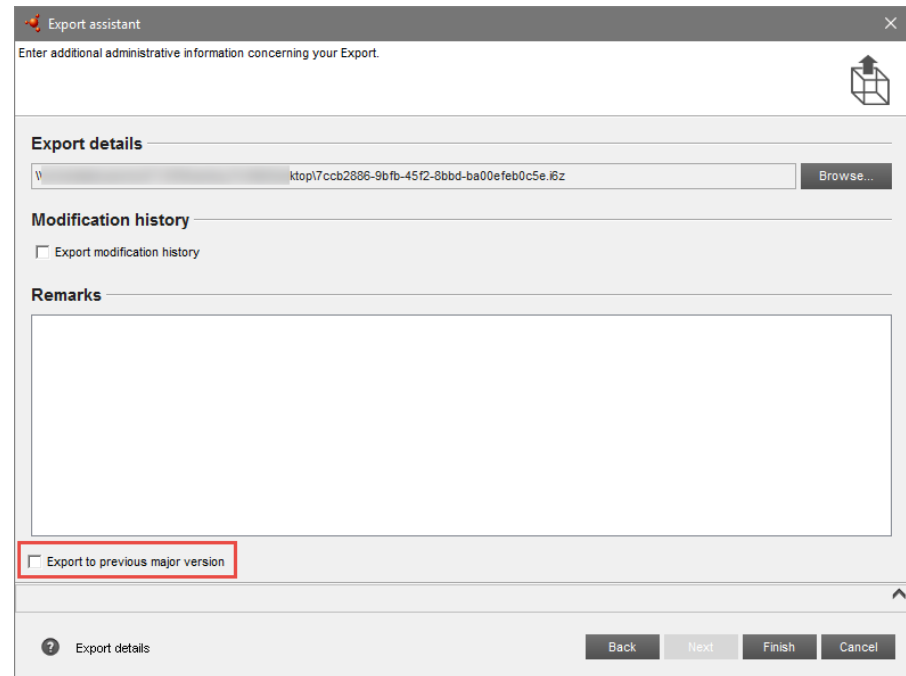

Extension of the compatibility between IUCLID versions

- Forward migration is still maintained (*i.e. the latest version of IUCLID 6 can accept all IUCLID 6, and IUCLID 5.6, files*)
- Aim: export of .i6z files from IUCLID 6 v2.0.0 that can be loaded in IUCLID6 v1.x.y
- Backward migration rules have been defined

Export in the previous version format

- Using the export function, there is an option to export to the previous IUCLID 6 format 'Export to previous major version'
- This option is available for datasets and dossiers
- Also available for bulk export
- You can use this option when you need to exchange information with a user who is still using IUCLID 6 version 1.x

The screenshot shows the 'Export assistant' dialog box. The title bar says 'Export assistant'. Below the title bar, it says 'Enter additional administrative information concerning your Export.' There is a small icon of a cube with an arrow pointing up. The dialog is divided into several sections: 'Export details' with a text field containing 'ktopl7ccb2886-9bfb-45f2-8bbd-ba00efeb0c5e.j6z' and a 'Browse...' button; 'Modification history' with a checkbox labeled 'Export modification history'; 'Remarks' with a large empty text area; and at the bottom, a checkbox labeled 'Export to previous major version' which is highlighted with a red rectangle. At the very bottom, there is a status bar with a question mark icon and the text 'Export details', and four buttons: 'Back', 'Next', 'Finish', and 'Cancel'.

What happens when exporting to the previous format?

- Backward migration rules are in place to transfer the information back to its previous location (reverse migration)
- When the backward migration is not possible, for example for new fields or new phrases in picklist, or new documents, the information is migrated to
 - The 'other:' field or a remark field if available (e.g. for picklists)
 - A generic text field (e.g. remarks or summary)
 - An attachment
- The data is kept during backward migration but the structure is lost in some cases
- When migrating back to the latest version of IUCLID 6, the standard migration rules are executed (i.e. the structure lost during the backward export is **not** recovered)

Note to Chesar users

IUCLID 6.2 and Chesar 3.3

- Chesar 3.2 is compatible with IUCLID 6.1
 - Chesar 3.3 is compatible with IUCLID 6.2
- If you intend to upgrade Chesar to version 3.3
update IUCLID to version 6.2 too
- If you intend to upgrade to IUCLID 6.2, update
Chesar to version 3.3 too

Installation and update

- **Desktop**
 1. Download the installer
 2. Follow the steps of the installer assistant or watch the video tutorial
- **Server**
 1. Download the installation package
 2. Read the installation instructions

› IUCLID 6 installer and updater: which one should I download?

Available downloads

The latest version of IUCLID 6 is 6.2.0, released on Tuesday 15th of October 2019.

In connection with your IUCLID 5.6 instance, you might want to consult the following links:

■ **IUCLID 6 Desktop installer:** this download provides all you need to install IUCLID 6 on your desktop.

📦 Windows 64-bit (621 MB) | 📦 Windows 32-bit (642 MB)

■ **IUCLID 6 Server:** this download contains all necessary software to install IUCLID 6 using client-server architecture, including its application server.

📦 Download (552 MB)

<https://iuclid6.echa.europa.eu/download>

Update from IUCLID 6.x

- Download and run the IUCLID 6 updater
- One upgrader for all Windows & Linux versions
 - Desktop, Win. 32-bit
 - Desktop, Win 64-bit
 - Server
- One upgrader for Mac OS
- It will update any IUCLID 6 installation to the latest version (6.2), migration included

■ **IUCLID 6 updater:** this download provides all you need to update bit computers)

 Windows (347 MB) |  Mac OS X (347 MB)

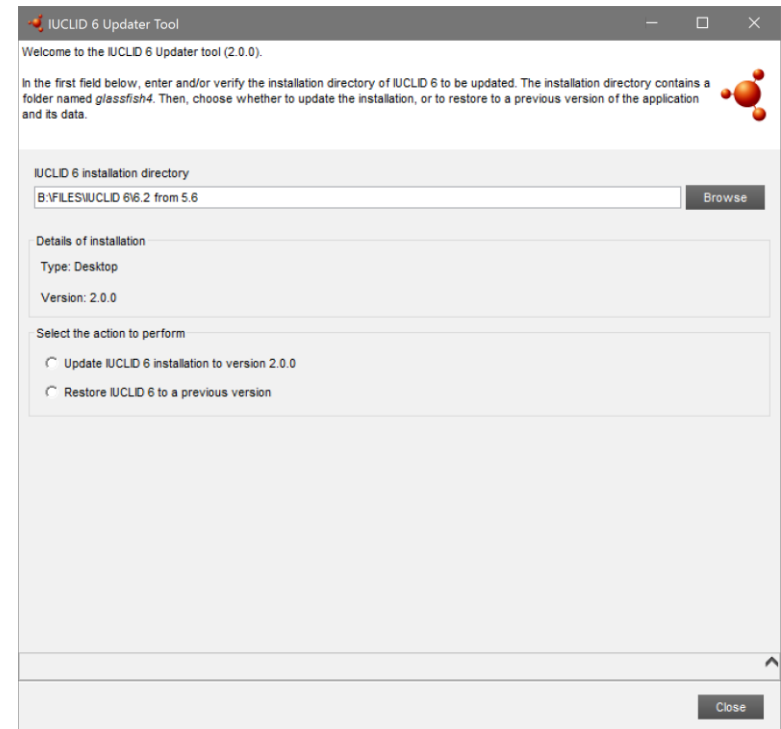

Update

IUCLID 6 updater

- Select (or verify) your IUCLID 6 installation directory
- You can either
 - Update
 - Restore to a previous version (in case a previous update attempt failed)

Update

IUCLID 6 updater

- Select a folder where a backup of your current installation will be saved
- Do not save in your IUCLID 6 installation folder

Update

IUCLID 6 updater

- The connection details for the IUCLID 6 database are detected, please check them
- In case you have your old IUCLID 5 database, you can enter the connection details to launch some database patches (optional and not needed if you run the patches with a previous IUCLID 6 update)

A screenshot of the IUCLID 6 Updater Tool window. The title bar says "IUCLID 6 Updater Tool". The main content area has a header "Update IUCLID 6 to version 2.0.0" and a sub-header "Enter and/or verify the connection parameters for the IUCLID 6 database." Below this, there's a section titled "IUCLID 6" with three input fields: "Database url:" containing "jdbc:derby:B:\FILES\IUCLID 6\6.2 from 5.6\glassfish-4\glassfish\domains\domain1\databases\iucld6", "Database username:" containing "IUCLID6", and "Database password:" containing "*****". A "Verify" button is to the right. Below the inputs, a note says "Note: The above parameters are required." At the bottom of the main area, there's a checkbox labeled "Was the IUCLID 6 installation migrated from IUCLID 5, and is the IUCLID 5 database still accessible?". At the very bottom, there are three buttons: "Previous", "Next", and "Close".

Update

IUCLID 6 updater

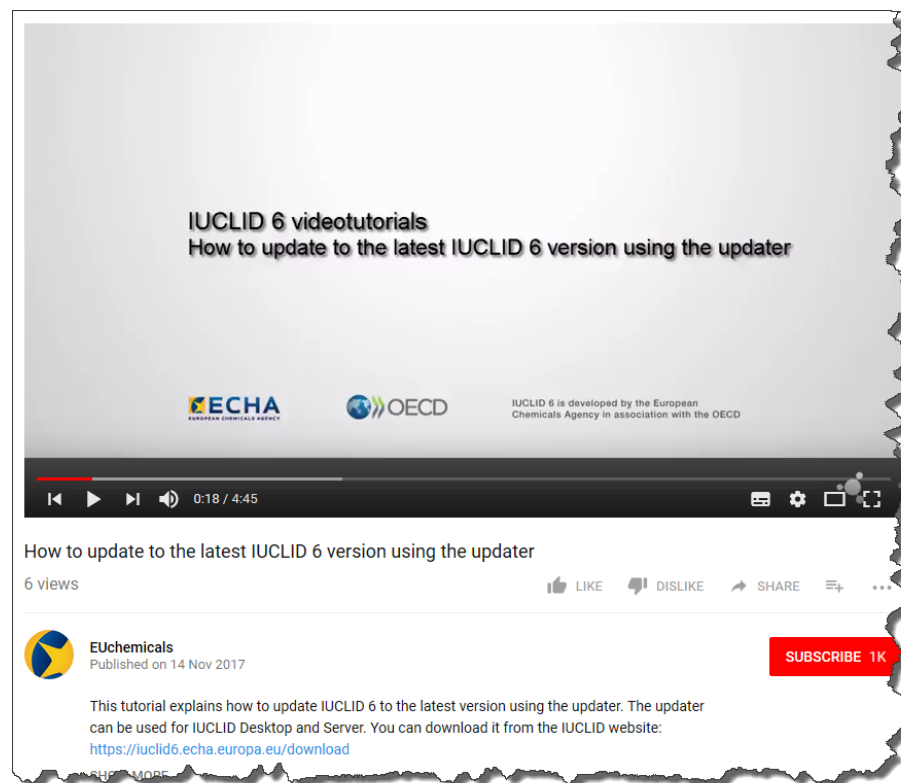

- A summary of the actions that will take place is displayed before launching the update

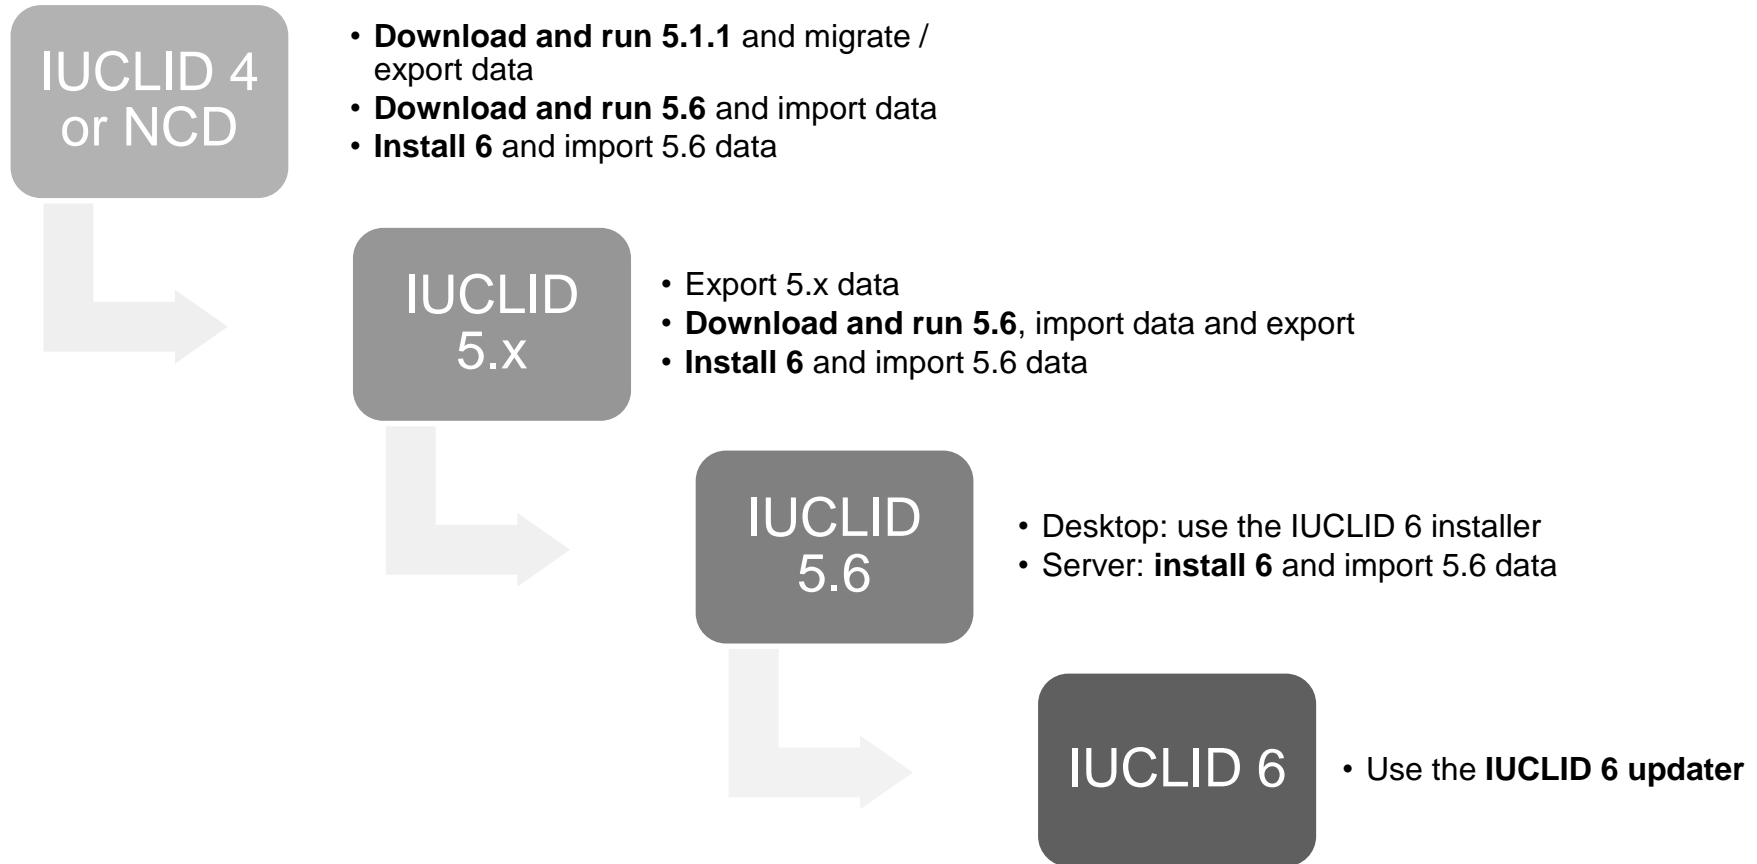

IUCLID 6 updater - Video tutorial

- A new video tutorial is available in YouTube to guide the user through the different steps of the updater
- Please have a look!

Different processes depending on your starting point

Fee calculator

- The Fee Calculator allows registrants to estimate the fee to be paid for their REACH dossiers
- The fee calculation is based on the company size, tonnage band and confidentiality claims included in the IUCLID dossier
- Use the calculator before submitting the dossier in REACH-IT and make sure that you:
 - Register in the right tonnage band
 - You haven't claimed unwanted confidentiality claims

Indicators needed for the fee calculation

- Some indicators will appear when there are specific confidentiality claims in the dossier or when the fee waiver has been claimed
- When a confidentiality has been claimed for the IUPAC name and/or the Safety Data Sheet, you will need to indicate whether:
 - the substance is hazardous and if the substance is PBT or vPvB
 - a safety data sheet is required for the substance
- The indicators will appear only if they are relevant for calculating the fee and if the required information is not already included in the dossier
- For calculating the fees of dossiers with tonnage band 1–10 tonnes/year where the fee waiver has been claimed, you will need to indicate whether the substance fulfils the Annex III criteria

Indicators needed for the fee calculation

- Hazardous substance indicator

Hazardous substance indicator

- ☐ The substance is hazardous as defined in Articles 119(2) or (g) and 14 (4) of the REACH regulation

- Safety Data Sheet indicator

Safety Data Sheet indicator

- ☐ A safety data sheet is required for the substance: the substance is classified under the CLP regulation, is PBT/vPvB, and/or is on the Candidate list

- Annex III criteria indicator

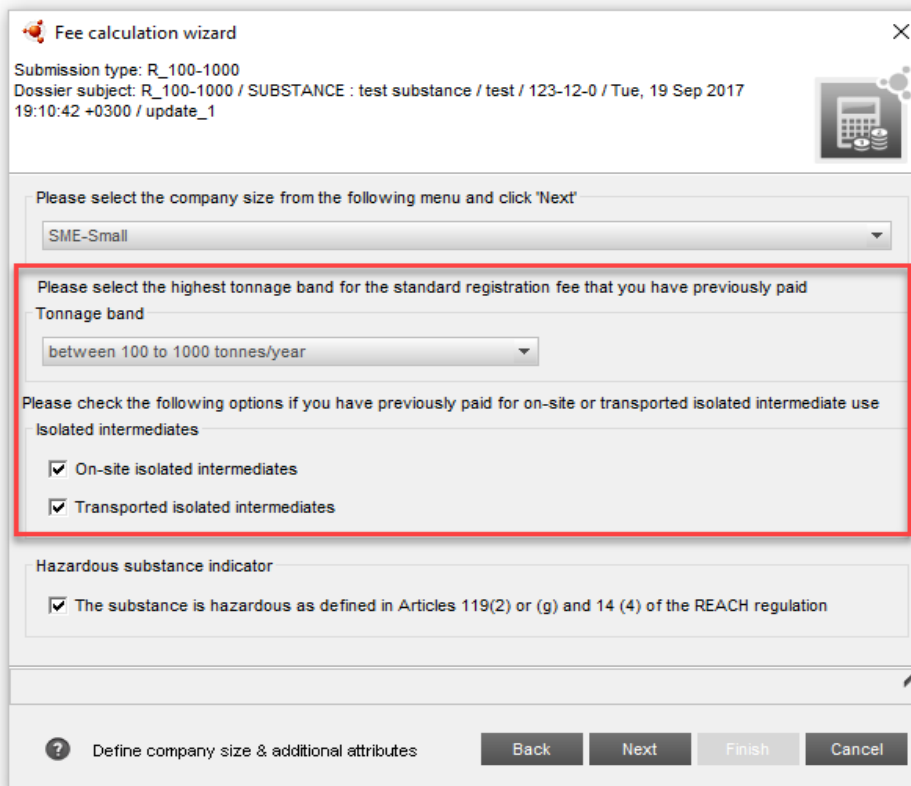

Check the following option if the Annex III criteria are not fulfilled

Annex III criteria indicator

- ☐ Not fulfilling Annex III criteria and voluntarily providing Annex VII. This means that:
- there is no indication that the substance has CMR or PBT/vPvB properties, and
 - there is no indication that this is a substance with dispersive or diffuse uses, classified as hazardous for human health or as an environmental hazard under the CLP Regulation, and
 - the full Annex VIII is being provided

Calculate the fee of dossier updates

- If the dossier is an update, select the tonnage band of the previous paid submission
- Tick the appropriate box if the on-site or transported intermediate use has been previously paid

The screenshot shows a 'Fee calculation wizard' dialog box. At the top, it displays submission details: 'Submission type: R_100-1000', 'Dossier subject: R_100-1000 / SUBSTANCE : test substance / test / 123-12-0 / Tue, 19 Sep 2017 19:10:42 +0300 / update_1', and a calculator icon. The main content area has three sections. The first section asks to 'Please select the company size from the following menu and click 'Next'', with a dropdown menu showing 'SME-Small'. The second section, highlighted with a red border, asks to 'Please select the highest tonnage band for the standard registration fee that you have previously paid'. It contains a 'Tonnage band' dropdown menu with the selection 'between 100 to 1000 tonnes/year'. Below this, it asks to 'Please check the following options if you have previously paid for on-site or transported isolated intermediate use'. Under the heading 'Isolated intermediates', there are two checked checkboxes: 'On-site isolated intermediates' and 'Transported isolated intermediates'. The third section is the 'Hazardous substance indicator', which has a checked checkbox for 'The substance is hazardous as defined in Articles 119(2) or (g) and 14 (4) of the REACH regulation'. At the bottom, there is a progress bar with a question mark icon and the text 'Define company size & additional attributes'. To the right of the progress bar are four buttons: 'Back', 'Next', 'Finish', and 'Cancel'.

Remember that...

- The fees calculated by the Fee calculator are only estimates
- The real invoice will be issued by REACH-IT after the submission of the dossier to ECHA

ECHA Cloud Services and IUCLID Cloud

IUCLID Cloud for SMEs

- Released at the end of July 2017
- Offers IUCLID to SMEs as a full service where ECHA hosts, maintains, and take care of the back-up of data, in the cloud
- New innovative web user interface that allows easy access to your IUCLID from anywhere at anytime.
- Functionalities tailored for the REACH 2018 deadline
- SME user who would like to move to the Cloud instead of updating their locally installed IUCLID can do so by exporting all their data and import it into the cloud with the bulk import functionality (for data \geq IUCLID 5.6)
- Trial service still available for everybody

IUCLID 6.2 in the Cloud

- Users of IUCLID Cloud do not have to do any actions. ECHA will take care of the update and migration of your data for you
- IUCLID 6.2 will be introduced to the Cloud on Monday evening 20th Nov.
- New subscriptions will be automatically in version 6.2
- Existing subscriptions will be migrated to version 6.2 the following nights with only a couple of minutes of interruption per subscription
 - IUCLID Cloud Trial – Migrated by 21st Nov. morning
 - IUCLID Cloud for SMEs – Migrated by 22nd Nov. morning

Exporting in the previous version of IUCLID from the Cloud

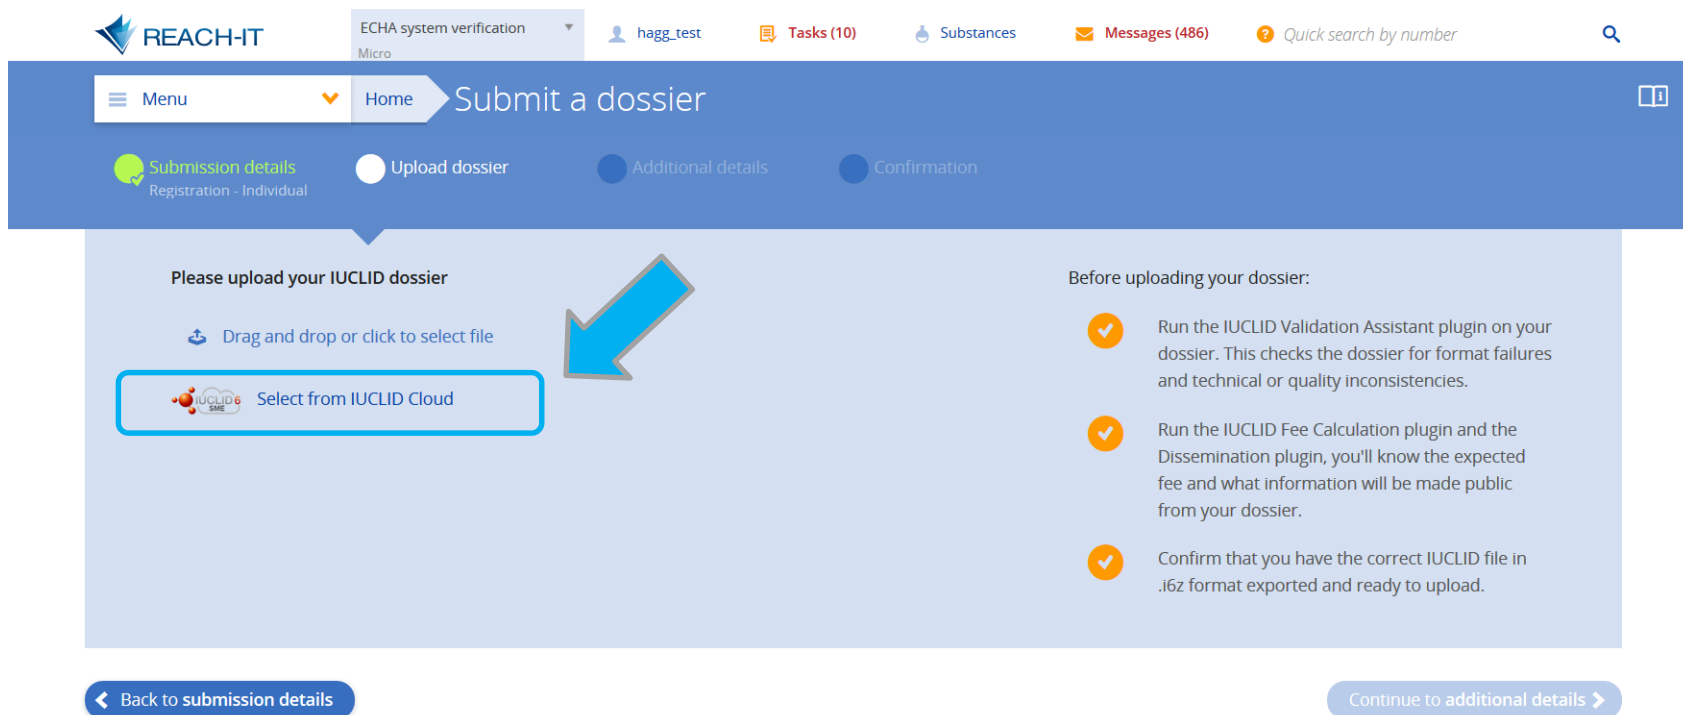

- The functionality to export has not yet been introduced to the browser interface. In order to export in the previous format users need to launch the Client and export it as explained earlier

Integration with REACH-IT

- Users of the IUCLID Cloud for SMEs can now **directly** submit Cloud created dossiers in REACH-IT without exporting and importing them

REACH-IT ECHA system verification Micro hagg_test Tasks (10) Substances Messages (486) Quick search by number

Submission details (active) Upload dossier Additional details Confirmation

Registration - Individual

Please upload your IUCLID dossier

Drag and drop or click to select file

Select from IUCLID Cloud

Before uploading your dossier:

- Run the IUCLID Validation Assistant plugin on your dossier. This checks the dossier for format failures and technical or quality inconsistencies.
- Run the IUCLID Fee Calculation plugin and the Dissemination plugin, you'll know the expected fee and what information will be made public from your dossier.
- Confirm that you have the correct IUCLID file in .i6z format exported and ready to upload.

IUCLID Cloud – Coming feature

Support for creating REACH 2018 dossiers

- Early January a new feature will be introduced to help beginners prepare registration dossiers

IUCLID Cloud – Coming feature

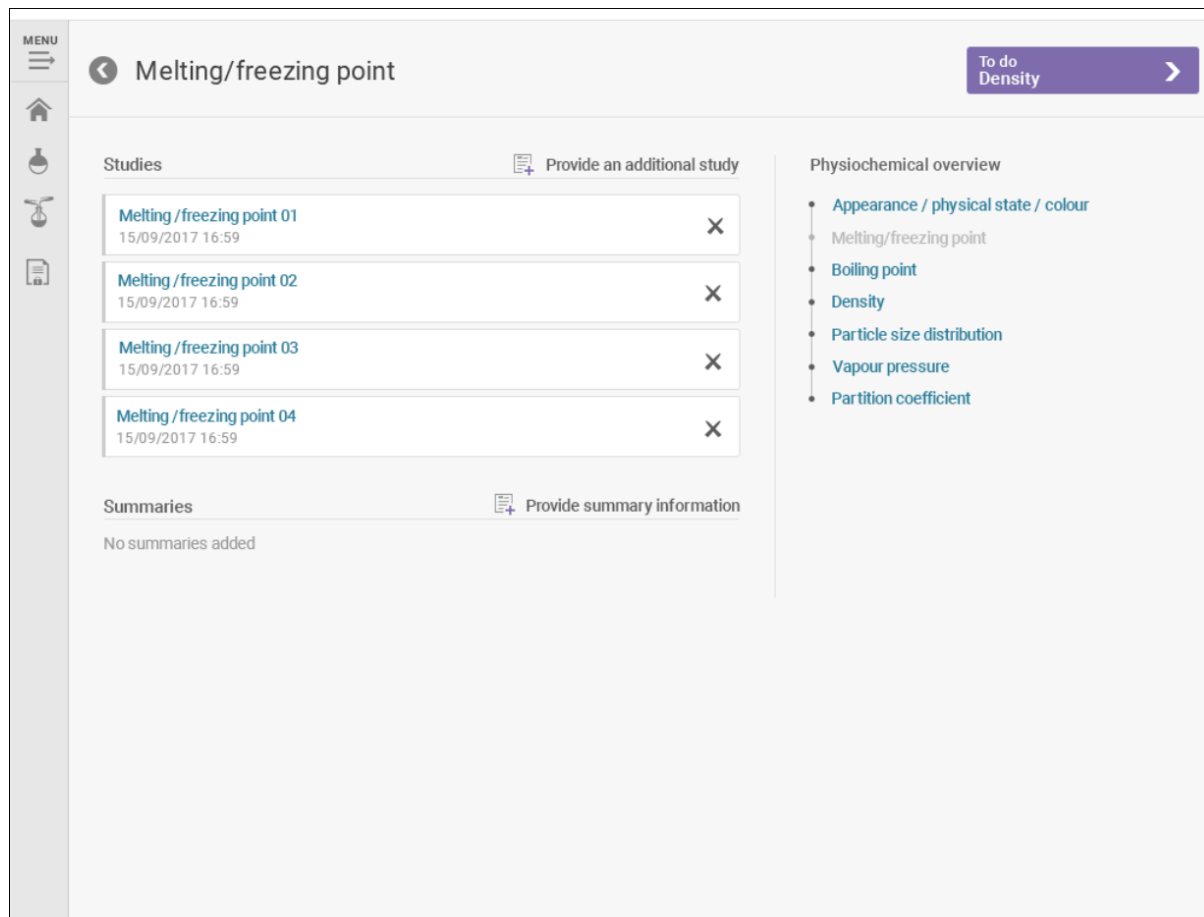

Support for creating REACH 2018 dossiers

- The dossier creation is divided up into smaller tasks that are accompanied with help

The screenshot shows the IUCLID 6 web interface for creating a dossier. At the top, there's a header with the IUCLID 6 logo, a globe icon, a bell icon, and a user profile icon labeled "Username Trasya". Below the header, a sidebar on the left contains a "MENU" button and several icons representing different functions. The main content area is titled "ECHA Training Substance" and includes a "Switch to dataset" button. Below the title, it specifies the "Submission type" as "REACH Registration 1-10 tonnes, physicochemical requirements". The interface is divided into two main sections: "1 Provide dossier information" and "2 Finalize your dossier". The first section is further divided into "Required" and "Additional" tasks. The "Required" tasks include "Substance Identification" (with a timestamp), "Substance uses", "Classification & Labelling", and "Physicochemical properties". The "Additional" tasks include "Annex III criteria" and "Opt-out information for REACH registration". On the right side, there's a "Last worked on" section showing the last completed task and its timestamp. At the bottom, there are two buttons: "Validate" and "Create dossier".

Support for creating REACH 2018 dossiers

- The dossier creation is divided up into smaller tasks that are accompanied with help

The screenshot displays the IUCLID Cloud interface for creating a REACH 2018 dossier. The main task is 'Melting/freezing point', which is part of a larger dossier. The interface is divided into several sections:

- Left Sidebar:** Contains navigation icons for Menu, Home, Studies, and Summaries.
- Top Bar:** Shows the current task 'Melting/freezing point' and a 'To do Density' button.
- Studies Section:** Lists four studies, each with a title, date, and a delete icon (X). The studies are:
 - Melting /freezing point 01 (15/09/2017 16:59)
 - Melting /freezing point 02 (15/09/2017 16:59)
 - Melting /freezing point 03 (15/09/2017 16:59)
 - Melting /freezing point 04 (15/09/2017 16:59)
- Summaries Section:** Shows 'No summaries added' and a button to 'Provide summary information'.
- Physiochemical overview:** A list of physiochemical properties to be added to the dossier:
 - Appearance / physical state / colour
 - Melting/freezing point
 - Boiling point
 - Density
 - Particle size distribution
 - Vapour pressure
 - Partition coefficient

You can continue to send your questions during the next 5 minutes
