

IUCLID training – next steps

Online training session SPC-IUCLID
for industry users

24 October 2023

10:00 - 13:00 EEST

Agenda

- **Introduction** (10:00-10:15)
- **IUCLID** (10:15-11:45)
 - Overview of SPC IUCLID functionalities
 - Introduction to exercises
 - **Introduction to SliDo and next steps**
 - Q&As
- **R4BP 3** (11:45-13:00)
 - Demo of submissions in R4BP 3 of the SPCs from exercises
 - Q&As

Training page on the IUCLID website

→ On the IUCLID website, you will find

- The IUCLID introduction presentation
- The exercises description and relevant IUCLID files
- The recordings of the resolution of the exercises

<https://iuclid6.echa.europa.eu/training-material>

EU Biocidal Products Regulation - BPR

The scientific information provided in the following exercise is not necessarily accurate but will help you to carry out the necessary steps to complete a biocidal products application. It provides technical advice only, no regulatory advice. Further information on BPR dossier creation can be found in the [BSM Technical guide: how to prepare a biocides dossier](#).

SPC training session for Industry, online event (24/10/2023)

This training session is organised in the context of the transition from the SPC Editor to IUCLID to prepare the Summary of Product Characteristics under the EU BPR. You will find below all necessary materials needed to complete the IUCLID-relevant parts of this training:

- [Introduction to IUCLID for SPC users](#) (2.5 MB, .pdf)
- [Exercise instructions](#) (1.73 MB, .pdf)
- [Relevant IUCLID 6 files](#) (~300 KB per file, .i6z)
 - [Part 3, authorised dossier](#)
 - [Part 5, dossier for validation](#)
- [Solutions to the exercises](#) (on the IUCLID YouTube channel)
 - [Part 1](#)
 - [Part 2](#)
 - [Part 3](#)
 - [Part 4](#)
 - [Part 5](#)

From the training session on 24/10/2023, until the 14/11/2023, a [Slido session](#) is opened to collect any questions related to the training. The ECHA team will answer as soon as possible during that period.

Where and when to test?

- We recommend using v7.10 of IUCLID 6 to be published on Monday 30th of October
 - Download the Desktop version
 - Use your ECHA Cloud subscription
 - Update your IUCLID instance (Desktop or Server)
- v7.10 is already available with the Trial subscription in the ECHA Cloud Services
- More information on the different options to access IUCLID
 - <https://iuclid6.echa.europa.eu/download>
 - 'Cloud, Desktop or Server - which version of IUCLID is best for me?'

Download

Cloud, Desktop or Server - which version of IUCLID is best for me?

IUCLID 6 is available in three different versions. These provide the same main functionalities, but are designed to cater to different sets of user requirements.

IUCLID 6 ECHA Cloud services

A IUCLID Cloud service is provided by the European Chemicals Agency (ECHA) for preparing dossiers under REACH and CLP; and not Poison Centres and SCIP. Companies and their consultants are encouraged to use the cloud service as it means they no longer have to install IUCLID locally on a computer, but will have direct access to the latest version in a web browser – anytime, anywhere. The service comes with 5 GB of data storage, fully managed backups and dedicated helpdesk support, at no charge. Go to [ECHA Cloud Services](#).

IUCLID 6 Desktop

In IUCLID 6 Desktop, IUCLID 6 runs on a single machine. One user accesses one database, with no network connection necessary. The database is integrated into the IUCLID application. There is no need to install database software separately. The installation process, maintenance and upgrades are designed to be as simple as possible. This is aimed at SMEs, and those who simply want to try out the software.

IUCLID 6 Server

In IUCLID 6 Server, IUCLID 6 runs in an application server. A user connects to the application over a network using a client program that runs on any machine that has network access to the server. Many users can access the same instance of the application and therefore the database at the same time. Access to documents can be restricted per document, per user, and per groups of users. The database software can be installed separately from the IUCLID 6 application server and client(s). This type of installation is intended for use by larger companies and organisations.

IUCLID 6 Server is marked out from IUCLID 6 Desktop visually by having a grey ring around the orange icon.
