Table of Contents

Table of Contents	i
1. Introduction	1
2. Version 1.5.1 (09 February 2021)	1
3. Version 1.4.0 (19 August 2020)	2
4. Version 1.3.1 (29 April 2020)	2

1. Introduction

Please also refer to the [Frequently Asked Questions](#) on the IUCLID website for known issues, and if relevant, workarounds and advice on how to handle such issues.

The release notes highlight changes compared to the previous published version of IUCLID Data Extractor.

In the next sections, new features and improvements are identified by the labels **NEW** and **IMP** respectively. Bug fixes are labelled **FIX**.

2. Version 1.5.1 (09 February 2021)

IMP Line breaks and tabs are removed from extracted text data. The following actions are carried out:

1. Replacement of line breaks in Windows format (`([\r\n]+)`) by a single space character each.
2. Replacement of tab characters (`([t]+)`) by a single space each
3. Quotation marks are not added around columns. Quotation marks that are part of a text value are unaffected.
4. Columns are separated by tabs.

Ref: IUCDEXT-372

IMP IUCLID Data Extractor is compatible with the format of IUCLID 6 v5.

Ref: IUCDEXT-483

IMP Support has been added for Oracle 19c.

Ref: IUCDEXT-490

FIX A definition of an extraction exported from v1.4.0 as a file in JSON format, cannot be imported back in to v1.4.0. This has been fixed.

Ref: IUCDEXT-504

FIX When large sets of fields are selected for many targets (> 20 K) and the output is Normalised, OutOfMemory errors occur. This has been fixed and tested for large sets of data.

Ref: IUCDEXT-511

FIX Where the data submission type was part of a group of types, not all header data were exported. For grouped submission types, for example REACH group 2, a user is now able to select the required dossier header fields, which are extracted for all the submission types belonging to that group.

Ref: IUCDEXT-512

FIX Where there were multiple rows within a literature reference, when the *Normalised* format was used, only one of the rows was extracted. JSON was not affected. This has been fixed.

Ref: IUCDEXT-517

3. Version 1.4.0 (19 August 2020)

IMP Group identical submission trees under TOC picklist. When selecting fields, the TOC used in the display of the fields can be selected from the TOCs available. The selection of TOCs has been made more compact by grouping together identical TOCs.

Ref: IUCDEXT-327, IUCDEXT-329

IMP How to handle SCIP article notification in Data Extractor. The entity of type *Article* which is used for SCIP notification dossiers, has been added to field selection under *Other*.

Ref: IUCDEXT-476

IMP Retrieve logged in user roles without the use of IUCLID admin user. During installation of Data Extractor (step 7) there is no longer any need to enter the credentials for the IUCLID user SuperUser.

Ref: IUCDEXT-489

4. Version 1.3.1 (29 April 2020)

FIX Administration dashboard page. Non-admin users could see the admin dashboard. This has now been restricted to only admin users.

Ref. IUCDEXT-428

FIX Extracted outcome lacks some IUCLID fields. This was identified as occurring in cases where documents contain nested blocks and tables with many rows. This has been fixed.

Ref. IUCDEXT-467

FIX H2 sql error during normalisation. This is a non-blocking error that can occur where the extraction has a large number of targets. A warning message has been added.

Ref. IUCDEXT-441

FIX IUCLIDDE Industry - Login to the extractor is possible with incorrect password. This has been fixed by the introduction of IDP in to the authentication mechanism.

Ref. IUCDEXT-479

FIX Label and value is missing from json and csv.

Ref. IUCDEXT-429

IMP Mechanism to upload the manual or to link a manual in an external link. The functionality to upload a help file and/or provide a URL for it has been added to the admin dashboard.

Ref. IUCDEXT-408

IMP Security assessment findings. The security of the IUCLID Data Extractor was reviewed. A number of improvements were introduced including the introduction of IDP, which also fixed the bug as referenced above IUCDEXT-479.

Ref. IUCDEXT-443

IMP Support IUCLID IDP connection in the industry installation process. IDP was introduced, as referred to above in IUCDEXT-479 and IUCDEXT-443.

Ref. IUCDEXT-451

IMP Impact assessment of IUCLID changes (6.4.0). Added the dossier type SCIP.
